

"Seagren Construction has partnered with me on major renovations as well as detailed custom work over the last decade in several different types of branded and independent hotels. Ron and his team are responsive, work around the challenges of this business, complete projects to budget, on time, with minimal change orders and stand behind the quality of work."

Tim Wolfe
Regional General Manager
Sheraton Denver West

The Seagren Construction Story

Seagren Construction LLC has been providing high-quality construction services to the hospitality industry for over 25 years. When Ron Seagren founded the company, his focus was to develop a team of experienced construction professionals dedicated to completing high-quality and value driven projects on time.

Our Company's impeccable standards for integrity, personalized service, craftsmanship, and quality products are also the criteria when selecting subcontractors and material suppliers.

A comprehensive and thorough pricing process is completed by experienced professionals who anticipate all aspects of your project and have extensive knowledge of product availability. The result is a completed project within your time requirements and the accurate pricing you need to manage your budget.

The hospitality team continues to provide industry leading construction services by hiring only the top professionals dedicated to developing loyal customer relationships, maintaining close team communications, staying current with best practices, and minimizing environmental impacts.

"Our core value of 'Five Star Quality Construction' is applied to projects of any scope."

Ron Seagren

Capital Projects / Renovations

We understand your unique operational needs even in the midst of a construction project. Our onsite crews know they represent you and minimize impact to your guest's comfort and experience.

A dedicated Project Manager collaborates with owners, senior management, front-line staff, design teams and tenants to implement the most effective completion methods while our structural department ensures projects are sound and built for longevity.

We have developed a renovation process that has increased the speed and efficiency of our construction procedures, with a flexible schedule to accommodate high volume traffic or unforeseeable conditions.

We can take your project to completion by offering installation, liquidation and assembly of FF&E.

Response / Repair / Maintenance

Seagren Construction will quickly mobilize to seamlessly address property damage from emergency response to repair completion in the most cost effective manner.

After performing a Property Conditions Assessment, we design a thorough preventative maintenance and renovation program to address your specific challenges. This investment has an immediate ROI in subsequent maintenance and labor cost reductions.

Whether you are seeking to maintain your competitive advantage by upgrading the "look & feel" of your property, maintaining high brand scores, lowering your overall maintenance costs, or require responding promptly to property damage, Seagren Construction is your trusted contractor. Join our loyal customers who enjoy our dedication to delivering unparalleled service, competitive prices, and cost saving efficiency! We do it right!
